

# Snapshot of the **MONTH**

*The Wave  
of the  
Future...*

**CANNED  
CORN!!!**

With gas prices spiraling weekly, Roger McEowen of Greenville has apparently found a way to cope with this budget-busting situation. With his genetically altered corn, using heat and radiation from the sun and moisture from the stalk, he hopes to distill one quart of Ethanol per ear. Talk about efficiency... **LOOK OUT OIL COMPANIES!!!** He also raises Giant Russian Sunflowers and says it's nothing for them to grow to a height of 12 feet and have flower heads up to 18 inches in diameter. Mr. McEowen, we like the way you think **"BIG"!!!**
